-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to mounting apparatus, classified in class 361, subclass 810.
 - II. Claims 17-34, drawn to a mounting guide support, classified in class 361, subclass 756.
 - III. Claims 35-52, drawn to a method of mounting a printed circuit board, classified in class 361, subclass 802.
 - IV. Claims 53-76, drawn to an electronic module, classified in class 361, subclass 715.
 - V. Claims 77-91, drawn to a cable modem termination system, classified in class 361, subclass 827.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and IV-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use as a mounting block design not requiring the specific the support of II, not accommodating the specific electronic module of IV and not being used for the cable modem termination system of V; invention II has separate utility such as use as a support design not requiring the specific the mounting apparatus of I, not supporting the

specific electronic module of IV and not being used for the cable modem termination system of V; invention IV has separate utility such as use as an electronic module not using the specific mounting block design of I, and not being used for the cable modem termination system of V and invention V has separate utility such as use as a modem termination system not using the mounting block design of I, or the specific support of II or the specific electronic module of IV. See MPEP § 806.05(d).

Inventions III and I-II and IV-V are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the circuit board can be mounted without using the specific mounting apparatus of group I, support of group II, the electronic module of group III or the cable termination system of group V.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
